

Product Brief

Darbee Visual Presence™ COBALT™ (DVP 4000)

Overview

Darbee Visual Presence™ technology establishes a fundamental breakthrough for image realism. By embedding 2D and 3D pictures with depth information, a new visual experience is born.

Images actually help you to see them better. Enabled by parallel processing in a single chip, DVP represents the next generation of computational image processing for depth and realism. **Your eyes will thank you!**

Form
